

# THE PURE FOAMER

**MILK EASIER – FASTER – CLEANER**

- Optimum consistency of pre-milking foam
- No compressor required
- No more "bottle squeezing"

**CID LINES**

*Believe in hygiene!*

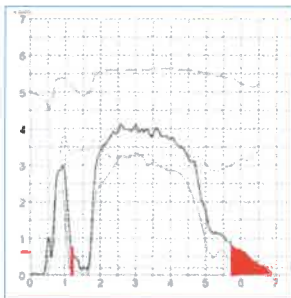

## THE PURE FOAMER

The system makes pre-milking easier than ever! The Pure Foamer is simple, economical, reliable, powerful and effective. No more "bottle-squeezing, just press the trigger.

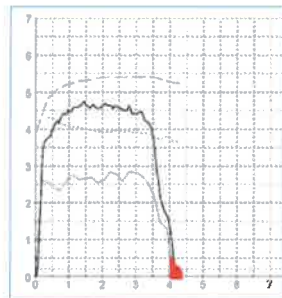

## GAIN MILKING TIME

The system allows optimizing the milking routine. The graph shows that with a stimulation of the cow 60-90 seconds before attaching the cluster, the cow let down the milk faster. Thus you spend 1 min to prepare the teats and milk cleaner, while gaining in total milking time!!!

Milk flow **without stimulation** (kg/min)

Milk flow **with an optimum preparation** (kg/min)

Source: Precision milking, DVM Dan Humphries & DVM Tom Greenham

## MILK CLEANER

Milk clean. The preparation of the teats with the Pure Foamer was evaluated according to the Teat cleanliness scoring chart (Source M-team UGent). 91,6% of the teats were scoring 1 or 2 (free of dirt or slightly covered with dirt).

### Score 1

Free of dirt or manure

### Score 2

Slightly covered with dirt/manure

### Score 3

Moderately covered with dirt/manure

### Score 4

Mostly covered with dirt/manure

## PRODUCT FEATURES

- No compressor required
- Easy to use
- Easy and quick to install
- 1 year warranty

## THE IDEAL MILKING ROUTINE
