

**PEARCE SEEDS TRIALS**

# Oil Seed Rape Trials 2016

## Conventional varieties

### Campus (KWS)

Most widely sown conventional variety in 2015. High yielding, high oil, stiff stems, very vigorous establishment and good all round disease resistance including tolerance to verticillium wilt. In the last three years, it has always been in the top three highest yielding varieties in Pearce Seeds trials.

A consistent and reliable variety.

### Elgar (Elsoms) – Sold Out

New on the AHDB list for 2016/17. High yields combined with early flowering, stiff stems and a robust agronomic package.

## Hybrid varieties

### DK Exalte (Monsanto)

Top yielding conventional hybrid in Pearce Seeds trials in 2016. Very strong agronomics scoring an 8 for both light leaf spot and stem canker combined with pod shatter resistance. Suits a range of drilling dates.

### SY Harnas (Syngenta)

An early flowering variety which is medium height with stiff stems which has been a consistent yielder when taken over Pearce Seeds 2015 and 2016 trials. Vigorous autumn establishment makes this a reliable variety.

### Dariot (DSV)

A candidate variety which stands well and scores a 9 for stem canker

## Clearfield Varieties

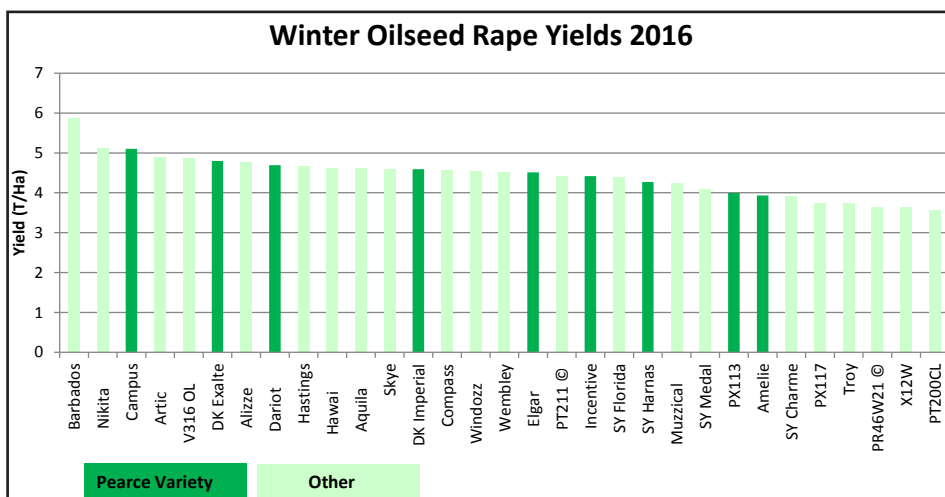

### DK Imperial CL (Monsanto) – Sold Out

Rapid autumn development plus pod shatter resistance, this variety will perform if drilling is delayed or conditions are less than ideal. Disease resistance scores of 8 for stem canker and 6 for light leaf spot.

## Semi Dwarf Hybrid variety

**PX113 (Pioneer)** This variety is typically 124 cm tall and combines robust disease resistance, 7 for light leaf spot and 8 for Stem canker with excellent resistance to lodging.

Winter Oilseed Rape Yields 2016

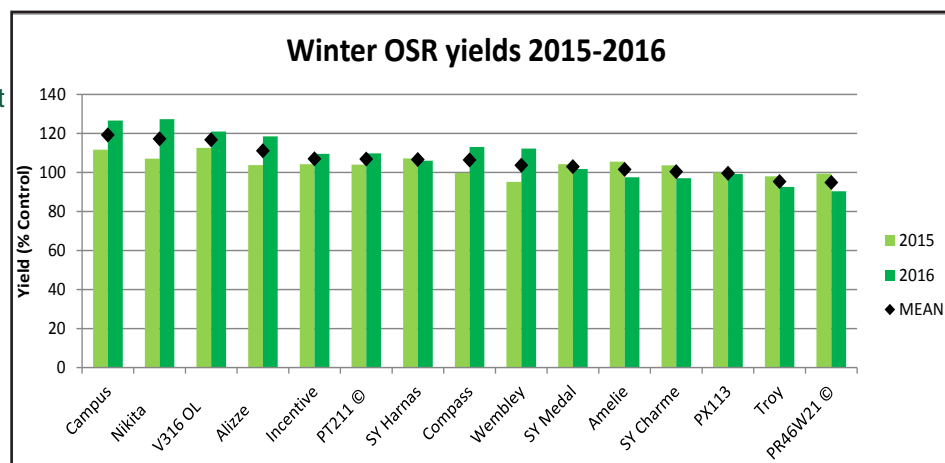

### Amalie (Limagrain)

The key trait of this variety is its resistance to Turnip Yellows Virus (TuYV). A medium height variety with stiff stems and good foliar disease resistance.

### PT 256 (Pioneer)

A new variety from Pioneer for 2016, PT256 boasts high oil (45.7) with very strong standing ability and an 8 for stem canker

Winter OSR yields 2015-2016

### Veritas CL (DSV)

A medium tall variety with strong disease resistance and very good drought tolerance.

### PT228 CL (Pioneer)

High oil content combined with a score of 8 for resistance to lodging and stem canker.

## Clubroot Resistant Varieties

### PT242 (Pioneer)

Strong disease package combined with good standing ability.
